

Technical information

THE LAP – office counter system has been designed by Piotr Kuchcinski. It is a modern solution, purposely designed to comply with the requirements of a first contact place, emphasising its representative character. The LAP counter is a multi-module system, providing wide arrangement possibilities and allowing you to adjust the shape of the counter to any room. Its well thought out construction enables functional arrangement of workplaces and provides comfortable space for computers. LAP counters can also be fitted with vertical and horizontal cable ducts which make the system more user friendly.
